FOREWORD

On behalf of the National Tender Board, it gives me great pleasure to introduce the 13th Annual Report of the National Tender Board, covering the financial year 2021, which is being forwarded to the Minister of Finance for presentation to the National Assembly pursuant to Section 31 of the Public Procurement Act 2008.

Public procurement refers to the purchase by governments and state-owned enterprises of goods, services and works. Since public procurement accounts for a substantial portion of the taxpayers' money, the Seychelles government expects state-owned enterprises to carry it out efficiently and with high standards of conduct in order to ensure high quality of service delivery and safeguard the public interest.

The report highlights activities of the National Tender Board during the year 2021 and includes the audited statements of accounts for that year. It also provides the results of various analysis of the statistical performance data available referring to projects presented to the Board, contracts awarded as well as their value.

The 13th Annual Report of the Board, which relates to the financial performance for 2021, highlights the activities of the Board within the scope of its functions under Public Procurement Act and Regulations as the Approvals Authority for the upper procurement thresholds as defined in the first schedule of the Regulations.

In continuing to ensure that bidding methods used and key factors affecting tender awards were in line with the provision and fundamentals principles of the Public Procurement Act, the Board remained focused on achieving the highest benefits of public procurement to public funds. In that regard the Board continued to ensure, as far as practically possible that the fundamental principles of transparency, competition and accountability. This is to promote integrity, fairness as well as building public confidence in the public procurement system.

Finally, I would like to take the opportunity to express my sincere appreciation and to thank all the members of the Board for their contribution, stewardship and support. I also wish to acknowledge the hard work and dedication of the Chief Executive Officer and staff of National Tender Board for their commendable performance during 2021. I also acknowledge the contribution of the Procurement Oversight Unit towards raising the standards of the public procurement. I look forward to the continuation of best practices in the future to ensure the upholding of the integrity of the procurement system in Seychelles.

CHAIRMAN

1.0 Introduction

The National Tender Board (hereafter referred to as NTB), was established under the Public Procurement Act 2008, as an approval authority for the upper threshold of government tenders, within the Procurement System of Seychelles, (i.e. above SR 750,000.00 for goods, works and non-consultancy services, and above SR 150,000.00 for consultancy services).

The offices of the National Tender Board are located within the Maison De Mahe Building, in the centre of Victoria, next to the clock tower. The offices consist of a bidding room where the tender submissions for government tenders are opened publicly as well as a Boardroom, whereby the Board meetings are held on a weekly basis.

The Board's Mission Statement is:

To promote the values of integrity, fair competition and good governance in the public procurement system

2.0 Functions of the Board

The main functions of the NTB, as established under the Public Procurement Act 2008, is to review the recommendations of the bid evaluation committees appointed for the different procurement and projects within the Procuring Entities.

The Board, after having reviewed the recommendation stated in the Evaluation reports, has the power to approve or reject the decision made. The Board is also mandated to request further independent evaluations of the bids and determination of the best evaluated bidders to be conducted. The Board strives to achieve the highest level of transparency and equity in the performance of its functions, taking into account equality of opportunities for all bidders, the need to obtain the best value for money in terms of price, quality and delivery, and transparency of the procurement process and decisions.

The Public Procurement System of Seychelles, is governed by the Public Procurement Act, (hereinafter referred to as the Act), which was enacted in December 2008 and the Procurement Regulations which was enacted in 2014.

3.0 Structure of the Board

The members of the NTB are appointed by the President in line with Section 14(1) of the Procurement Act (Part III). The members are appointed for a specific term of three years and to ensure the right balance of involvement of members on the Board, its composition was revised in 2021, to state that it shall comprise of seven members, out of which three needs to be from the private sector.

5.0 Budget

Section 31(2) of the Public Procurement Act 2008, requires the Board to prepare a report on its activities. The Board is a budget dependent organization and processes all financial transactions through the treasury single account system. It has no debtors and creditors and follows a cash basis accounting system as prescribed by the Financial Instructions.

The Board received an allocation of **SR 3.7** from the 2021 budget, as approved by the National Assembly. In 2021, the total expenditure of the Board was **SR 3,729,864.48** out of a budget of **SR 3,764,064.23**. Details of the certified accounts together with the Auditor's Certificate as at 31 December 2021 can be found at Appendix 1.

6.0 Secretariat of the Board

During the year 2021, the Board Secretariat consisted of four staff inclusive of the CEO as shown below:

- Chief Executive Officer
- Senior Procurement Analyst
- Procurement Analyst
- Assistant Administrative Officer

As has been the case over past years, the secretariat of NTB is also mandated to oversee the public opening of all projects above SR 150,000.00. The Secretariat ensures that the tender opening sessions follows the relevant legal and administrative procedures as set out in the Procurement Act and regulations.

The Secretariat, including the CEO being an ex-officio member of the Board, is also responsible to the Board for the following:

- Ensuring the effective management of the day-to-day affairs of the organization.
- Planning, organizing and coordinating the work of the organization, in preparation for **the weekly Board meetings or special board meetings**, including preparation of agenda. The Secretariat also has to vet the Evaluation reports being submitted to the Board for consideration and enquire on any omission in the records being submitted.
- Managing the budget of the organization;
- Ensuring compliance to the established internal procedures for the operation of the Board;
- Ensuring that the provisions of the Public Procurement Act as they relate to the National Tender Board are complied with in full;
- Attend to any issues relating to the compliance by Procuring Entities to the provision of the Act.

7.0 Overall Overview of the Procurement System

7.1 Institutions set-up under the Act and extent of Board Authority.

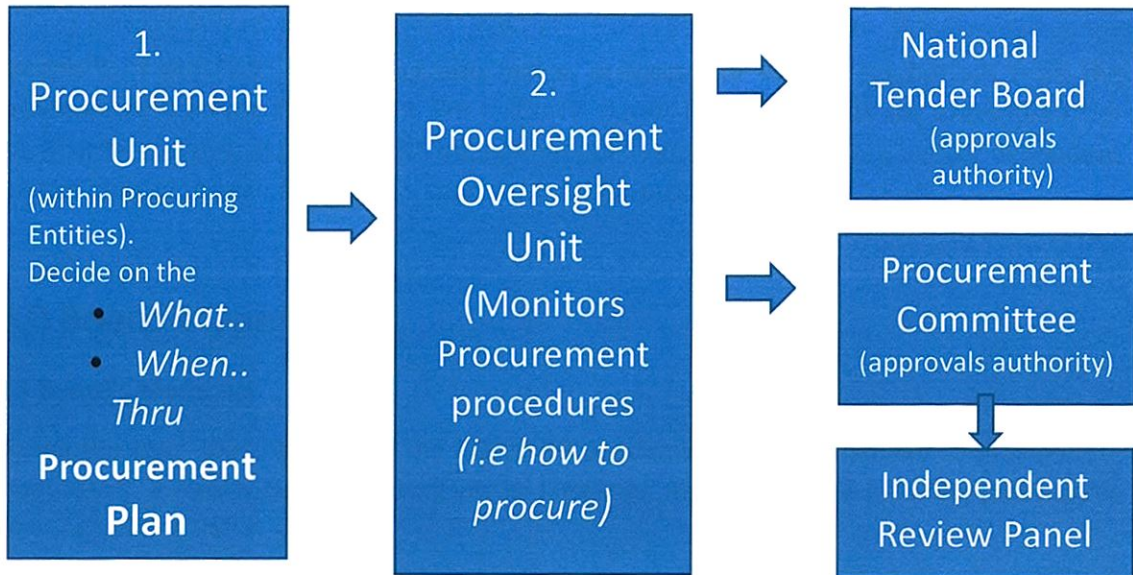

The Public Procurement Act makes provision for four distinct and separate institutional structures to be involved in public procurement, which has the main functions described below:

- a) **Procuring Entities (i.e. Ministries, Department and Agencies)**
The Act states that Procuring Entities should establish procurement units within its structure with the following functions:
The identification of the needs for goods and services and deciding on the most appropriate procurement method to be adopted. As per the Procurement Act, a procuring entity has recourse to three main types of procurement methods namely; direct bidding, limited bidding/selection and open bidding. Once the procurement process has been exhausted, the Entity needs to set up an evaluation committee to undertake the technical analysis and financial analysis and prepare an Evaluation Report to be submitted to the approval authority.
- b) **The Approval Authorities which comprises of the National Tender Board and Procurement Committees:**
The approval authorities have as main functions the responsibility to review the tender evaluation and approve or reject recommendations for contract awards, once all the appropriate procurement requirements have been met. The approval cycle of the procurement system stipulates that the Board reviews the tender recommendation for any public procurement submitted by the respective Evaluation Committees within the Procuring Entity. The recommendations are usually submitted through the submission of an Evaluation Report, which should ensure that the tenders awarded are the most responsive to the requirements of the bidding documents and provisions of the Procurement Act
- c) **The Procurement Oversight Unit (POU)**
The main responsibility of POU is to monitor the public procurement process and ensure its compliance to the Public Procurement Act 2008 and Procurement Regulations 2014, as well as implement policies and circulars to regulate the Procurement activities across the public sector.
- d) **The Independent Review Panel**
Has the responsibility to undertake investigations and review complaints and appeals submitted to it by aggrieved bidders.

The National Tender Board and all approval authorities, exercise total independence in the decisions it takes under the Act, and therefore act impartially in the discharge of its functions. All those organizations play a vital role in ensuring the integrity of the entire procurement system.

Summary of Institutions set-up under the Act

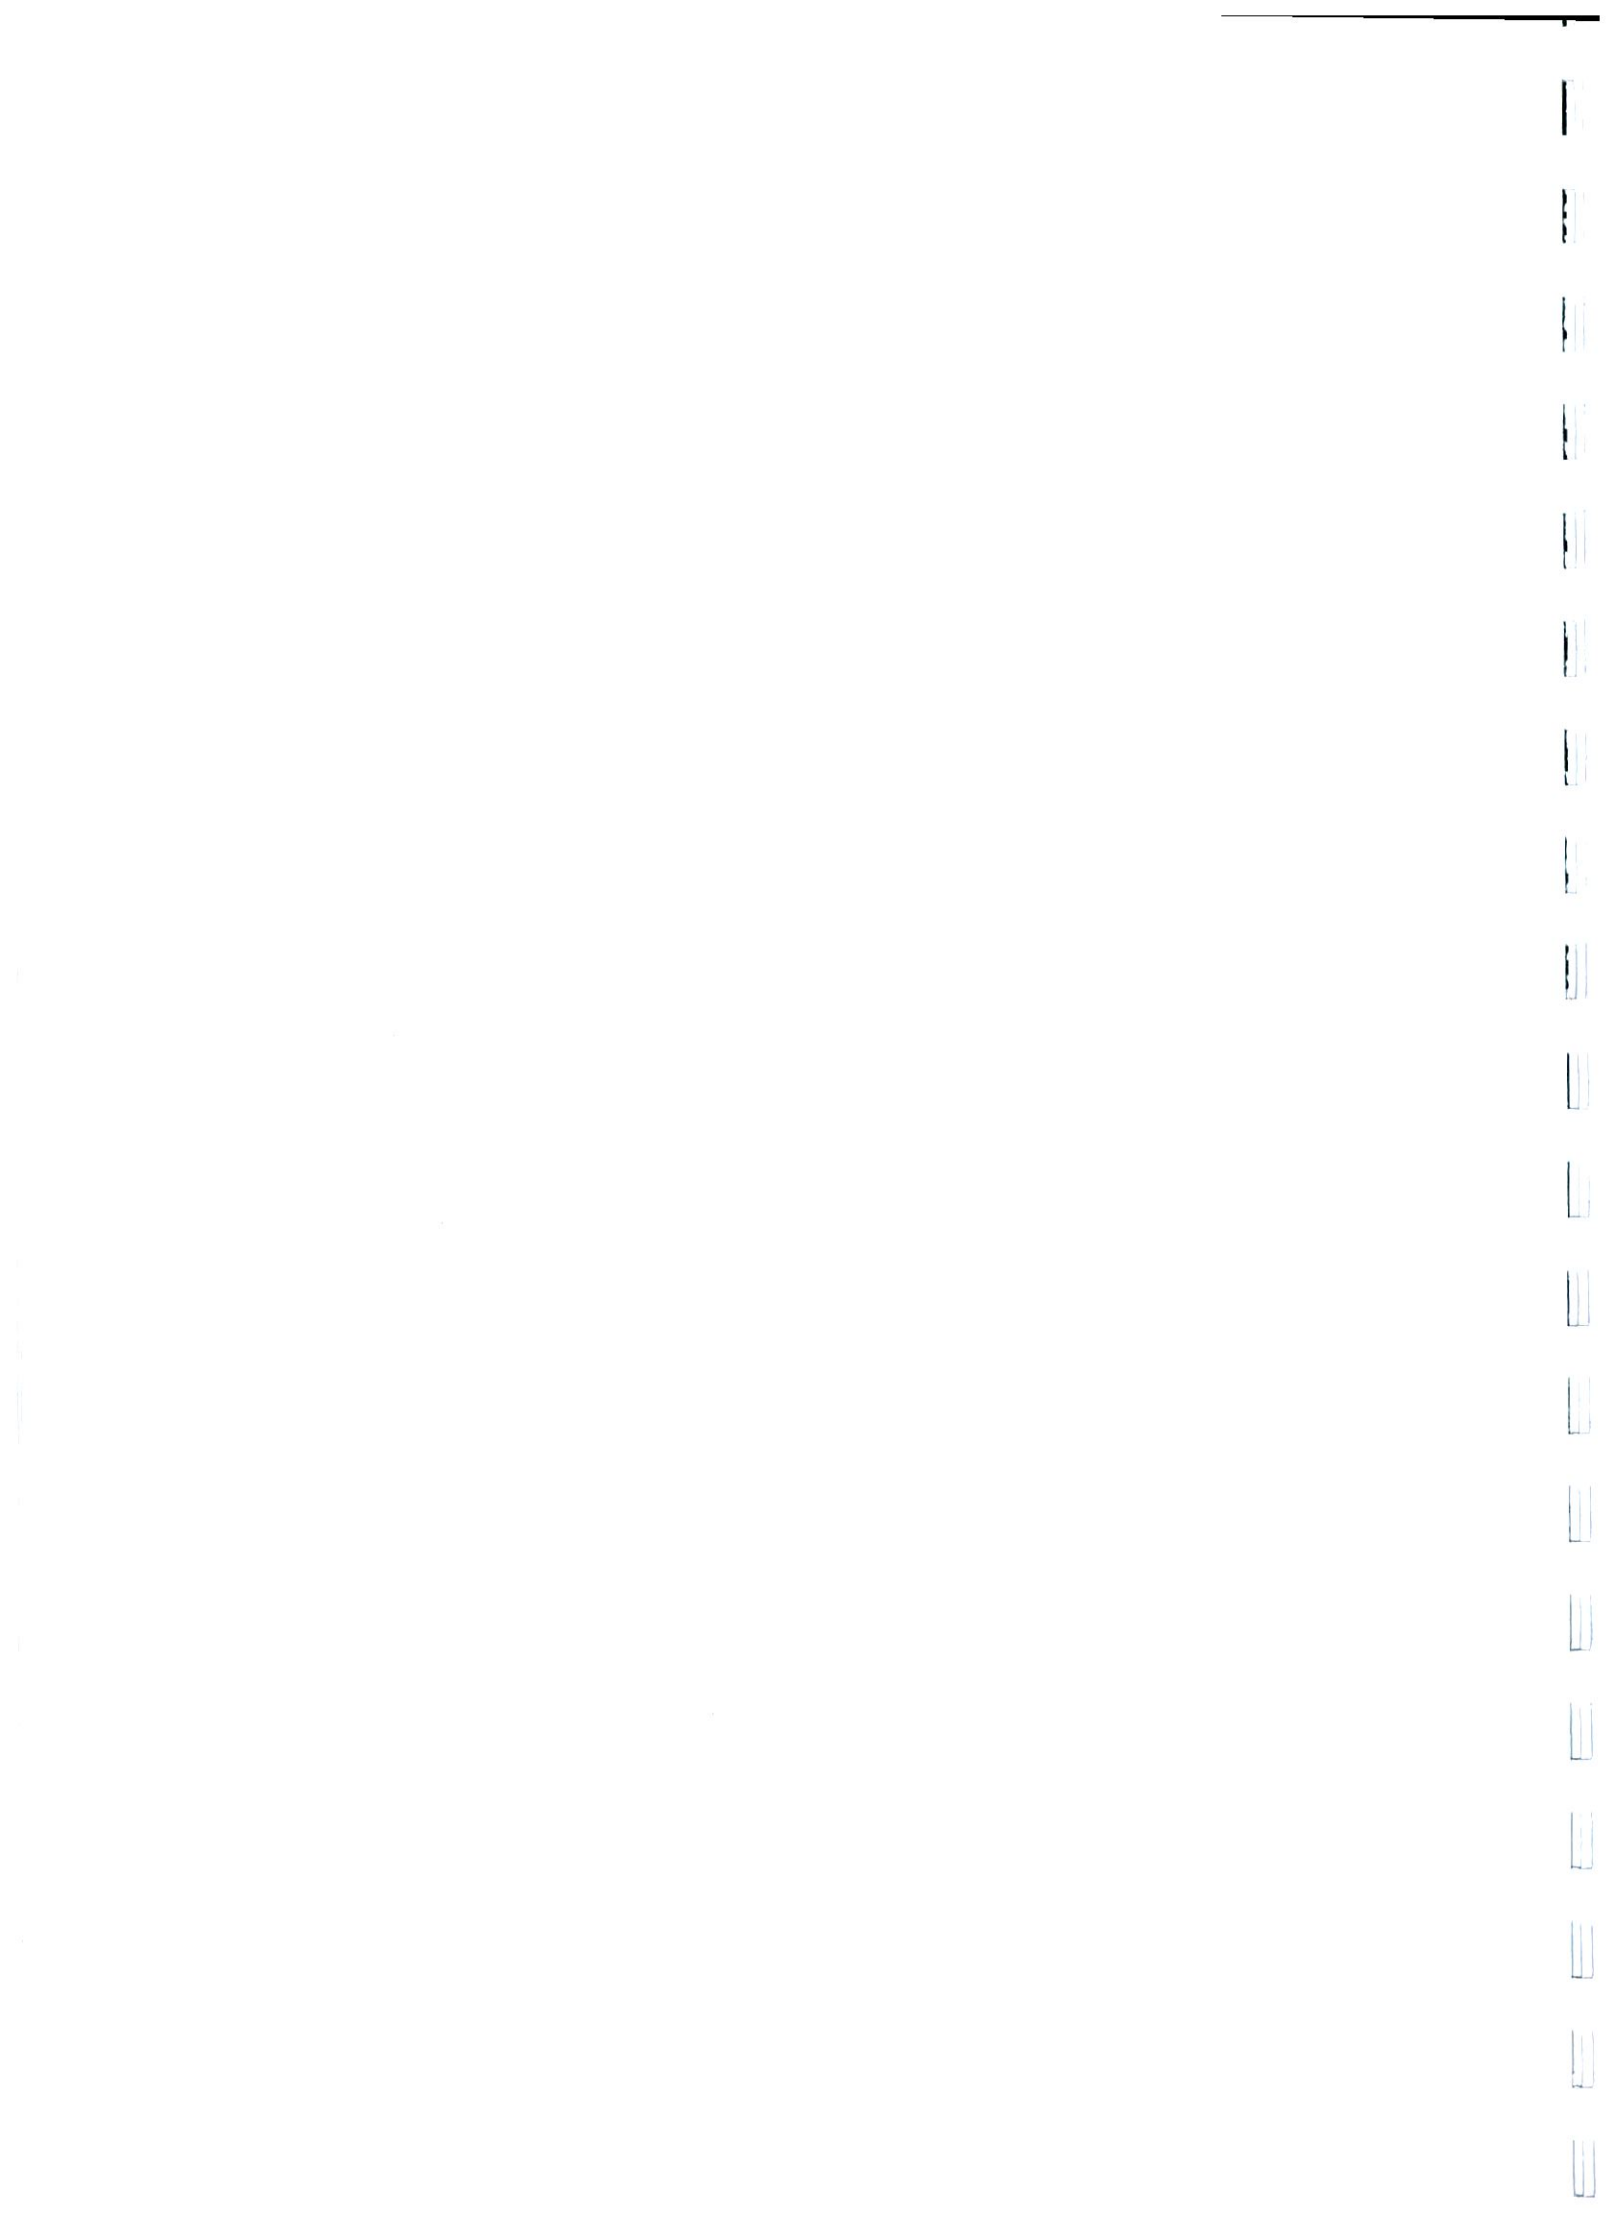

7.2 Operational Threshold as per the Procurement Act.

During 2021, the threshold as per the Public Procurement Act 2008, remained the same as per previous years, as detailed in the table below:

Type of procurement	Within Procuring Entities	Procurement Committees	National Tender Board
Goods & Services	up to SR150,000	SR150,000 to SR750,000	Above SR750,000
Civil Works	up to SR150,000	SR150,000 to SR750,000	Above SR750,000
Consultancy	n/a	SR0 to SR150,000	Above SR150,000

As illustrated in the table above, not all projects within the procurement system are approved by the Board. Procurements between SR 0-150,000 are approved internally within the

Table 1c:

BUDGET ALLOCATION (For Acquisition of Goods, Works and Services) FOR 2021 FROM THE MINISTRY OF FINANCE TO BUDGET DEPENDENT ORGANISATIONS.

Proposed Budget 2021	SR 4,123,968,000.83
Actual Expenditure 2021	SR 3,070,020,000.47

Table 1d: Source from Ministry of Finance

The total amount shown in Table 1(b) above, represents 18% of the total SR3 Billion of actual expenditure incurred by budget dependent public bodies for the year 2021. It can be assumed that the balance of 82 % is in respect of procurement which falls under lower thresholds and which is dealt with by either the different Independent Procurement Committees or within the internal threshold of Procuring Entity, as well as payment of other expenses such as utilities.

9.0 Secretariat Operations

This section of the Annual Report summarises the statistical data covering bid opening which is undertaken by the Board Secretariat on behalf of the Procuring Entities.

(a) General

During the period of **January to December 2021**, **1546** bids were opened at the National Tender Board, from **364** procurement proceedings compared to **2162** bids from **519** procurement proceedings in **2020**. The decrease in proceedings in 2021, can be attributed to the cost cutting measures which were implemented as a result of the COVID -19 outbreak, whereby the capital budget was streamlined and projects prioritised. Thus, less procurement was effected during 2021.

(b) Tender Opening Procedures

No major changes were made to the tender opening procedures in 2021, except that Procuring Entities were encouraged to make use of electronic tender submissions for international tenders. This was mainly in view of difficulties which many courier companies were encountering as a result of the COVID-19 pandemic.

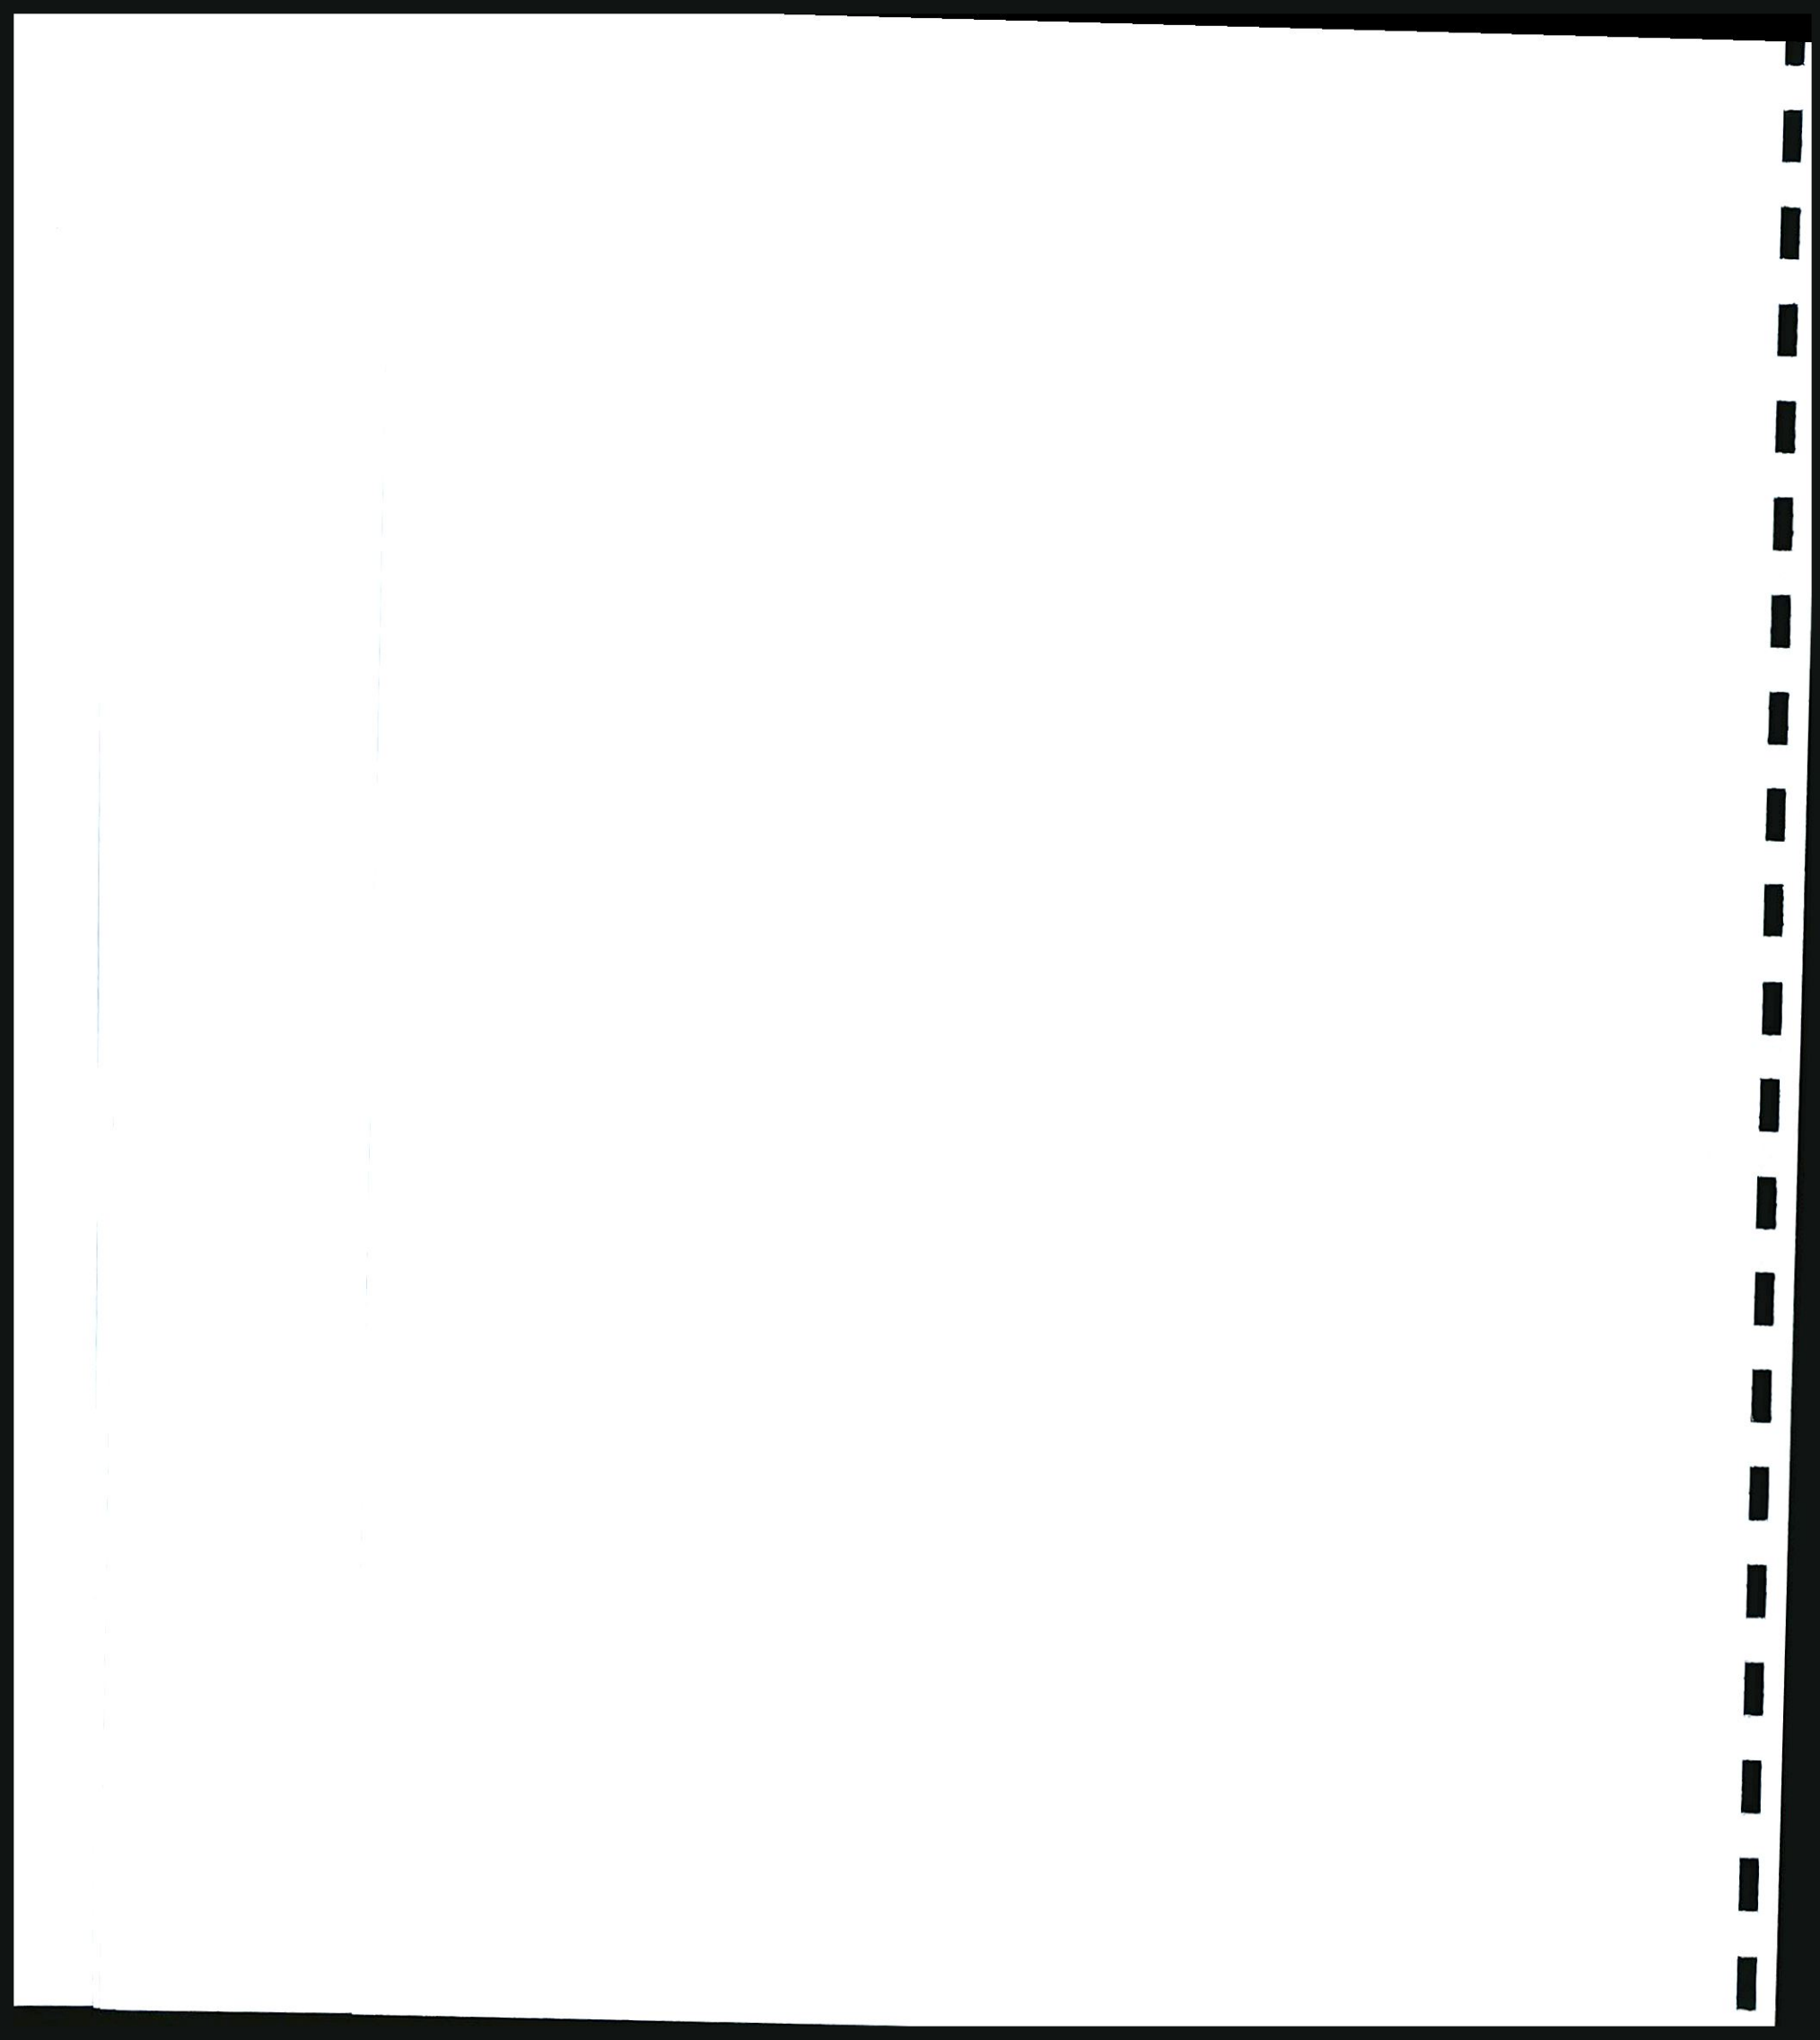

Similarly, to both manual and electronic submissions, once the bids are called out, the register of the bids received are kept, with details of the date and time received for each bid, as well as the signature of the person delivering the bid and the recipient at the National Tender Board Secretariat. Tenders are always opened in the presence of the bidders or their representatives, as well as representative(s) from the respective procuring entities and the staff of the National Tender Board, immediately after the deadline of the tender. Late bids brought in after the deadline, are rejected and returned unopened to the bidders. Minutes of the tender opening sessions are always recorded and bidders in attendance have to sign next to their company name to confirm the price. As part of promoting the transparency principle in the tender process, copy of the minutes of tender opening are posting on NTB's website and also made available at the office for bidders who have not been able to attend the opening session.

(c) Bid Opening for Community Projects

As has been the case over the past years, the Secretariat assisted the Department of Local Government with the opening of small district tenders under the threshold of SR 150,000.00. In the spirit of transparency, and to maintain conformity in the process, the tenders were opened at the National Tender Board Secretariat, Maison de Mahe.

Out of the total of 1546 bids which were received for the 364 projects nationwide, **138 projects** formed part of the small projects (**619 bids**) which were for the Ministry of Local Government. **Statistics Relating to Bid Opening.**

Figures 1 to 4 below provide statistics of the bids opened, broken down by procuring entities, procurement types, and bidding methods used (refer to Appendix 3 for details of the tender opening).

c) Goods and Services

Details of the value of contracts of the top 10 suppliers are shown in the tables below for goods and services:

1. "IN GROUP",	34,195,957.84
2. Birger International Ltd	28,554,139.66
3. NAFFCO	24,403,153.89
4. Wartsila Global Logistics Services	23,526,271.65
5. SICAMEX	12,145,168.80

	Total		9,015,041.00

**NATIONAL TENDER BOARD
2021**

1. Introduction

- 1.1 The National Tender Board (NTB) was set up under the Public Procurement Act, 2008 with the objective to promote, demonstrate best practices as well as fairness in procurement of goods and services in the public sector, ensuring transparency, checking corruption and malpractices during tender opening process, to earn the trust of their stakeholders.
- 1.2 The present Chairman of the Board is Mrs. Audrey Nanon who was appointed effective 1st November, 2021 for a period of three (3) years and its Chief Executive Officer is Mrs. Marie-Nella Fred assisted by three employees.

2. Audit Mandate, Scope and Objectives

- 2.1 The Auditor General is mandated to audit the NTB by Section 30 (2) of the Public Procurement Act, 2008 read with Article 158 (3) of the Constitution and to report the findings to management of the organisation for remedial action and then subsequently to the National Assembly.
- 2.2 The principal objective of audit, covering the period 01 January to 31 December 2021 was to enable the Auditor General to express an opinion on the reliability and correctness of the accounting records. The focus of the audit was on use of goods and services, wages and salaries, transport and non-financial assets.

Audit Observations

3. Audit observed that the Board incurred an actual expenditure of R3,730,516.98 in 2021. Audit covered the audit areas for use of goods and services, wages and salaries, non-financial assets and transport management as well as carried out follow-up on prior year matters not resolved in 2020 Management Letter for use of goods and services. (*See Attachment 6*). The audit tests undertaken revealed the following weaknesses:

4. Payments for Use of Goods and Services:

- 4.1 Audit examined the procedures followed and controls exercised by the Board in procuring goods and services during 2021. The Boards' actual expenditure on Use of Goods and Services for 2021 amounted to R2,330,912.98. Audit selected a sample of thirty-three (33) non-payroll payments, totalling R140,612.83, towards procurements relating to office running, repairs and maintenance and carried out substantive audit procedures. Audit also carried out substantive analytical procedures on payments, totalling R2,077,133.08, towards utilities, rent and board fees and observed the following shortcomings:
- 4.2 ***Lack of approval on invoices:*** In three (3) cases out of the thirty-three (33) sampled payments Audit observed that the CEO was not signing on the face of the invoices worth R26,833 towards payments for purchases including toners worth R15,650. However, Audit noted that the CEO was signing and authorising only the pro-forma invoice / quote schedule / memo instead of the invoices found attached. This procedure contradicts the Accounting Manual paragraph 7.7 (e) which says, "Each supplier's invoice will be evidenced by signing on the face of the invoice that checks stated in paragraph 7.7 (a-d) have been completed by the Accounting Officer or delegates." (*Refer to Attachment 1*)

Risk: Necessary checks on the invoices by the Accounting Officer are not being carried out before authorising the payments.

- Lack of approval
- Best offer/quotes/prices may have been overlooked

Details of

Vehicle No.	Pr	hi
S6	05	
	05	2
TOTAL		

Audit Comment: Audit noted the management response and will verify the action taken during the exit meeting.

- 5.3 **Miscomputation of the Fuel Consumption Analysis:** As per the Accounting Manual 2020, paragraph 7.10.2.1.3(e) states "A fuel consumption analysis is to be prepared on a monthly basis in respect of all government vehicles to ensure their efficiency and economic use of the vehicles, and this should be recorded in the Vehicle Log Book. Fuel consumption per month is calculated B/A where A= number of fuel in litres purchased during the month and B = total mileage covered for the month". Audit observed that the entity was calculating the fuel consumption analysis on a quarterly basis. Upon verification of the analysis, the following shortcomings were sighted;

- In four (4) occasions, the total km run per litre was not calculated and/or recorded.
- The total km run for the 1st quarter was not properly accounted for, as the KM used in March was not included in the computation. (Refer to Attachment 4) for Audit's re-computation.

Risk: Incorrect information used to calculate the Fuel Consumption Analysis. The fuel in litres per mileage run calculated might be over/under. The efficiency and economy of the vehicle may be wrongly calculated.

Recommendation: The entity should ensure that the fuel consumption analyses are correctly calculated to ensure an accurate depiction of the total fuel in litres per mileage run.

Management Response: It was agreed by the management that when the fuel consumption analysis is completed, someone independent would verify the entries and computation for accuracy in the future.

Audit Comment: Audit is of the opinion that the management is not addressing the matter as the same was reported in the audit for the year 2020 as such the Board was cognisant of the deficiency and was expected to have rectified the matter. The matter will be followed up.

6. **Non-Financial Assets.** Audit assessed the Board's procedures and controls over Non-Financial Assets and noted that the Board spent a total of R79,905 on non-financial assets in 2021. Audit selected all thirteen (13) assets purchased in 2021 worth R77,405 which were traced for recording in the Fixed Asset Register. Another sample of fifteen (15) (pre-owned) existing assets was selected to trace to the Fixed Asset Register for testing. A further twenty-five (25) assets were selected from the Fixed Asset Register and traced to physical existence. The following shortcomings were observed:

- 6.1 **Misclassification of Expenditure:** As per the Accounting Manual 2020, paragraph 7.1 (c) states "Care must be taken to ensure the correct expenditure account codes are always used." Furthermore, the Public Finance Management Regulations 59(c) requires that "Every Accounting Officer shall, prior to signing a payment voucher, ensure that: "entries are made in the appropriate records and the voucher is correctly made out and coded." Audit observed that in one occasion, a purchase had been disbursed to Tassels Home Décor under an inappropriate cost centre / expenditure vote as revealed in the table below:
